## FAQs

**How does it work?** We help you select a destination and date depending on your location and field of expertise. We do the planning and assist you in the marketing.

**What efforts are being made to maintain safety while traveling with the pandemic concerns?**

Each traveler must provide a negative Covid test or a vaccination prior to travel. Our small group tours allow for enhanced social distancing, cleaning frequently, and outside activities whenever possible.

**How much work time will trip planning add to my daily routine of running my farm and/or working a job?** Very little, we do all of the management/organization for each trip.

**How do I market the trip?** We will provide material to print and share via social media. We will also create a website registration form with your local extension agent logo/branding.

**How do I answer questions related to the trip?** Simple, put them in contact with us. As your travel manager, we are available via phone, text and email to answer any questions.

**What if we have single travelers?**

We can pair single travelers with other single travelers or they can get their own room.

**Do you need to be at a specific fitness level to travel?** No, these tours are arranged to accommodate all levels.

**Will I incur any cancellation expenses?** No, if you are unable to get enough travelers by the deposit date, the trip will be canceled with no fees.

**I like the idea but I'm too busy to travel.** No problem, we can help you find a community member to be the group leader. Most trips are planned 12-18 months in advanced, giving you ample time to prepare to be away from your job/farm/home.

**Can our community members bring friends or family?** Yes, we believe this experience provides a new opportunity for you to market what Extension(s) can do locally and increase or create new friendships.

**Why choose us?** Our tours are unlike any others. We combine traditional sightseeing with real farm and Agribusiness experiences. We have been organizing group trips to all continents for over 12 years.
