Q5 - Please share any other comments!

Please share any other comments!

These zoom classes have helped to keep me sane through the pandemic. Thank you!

The presentations are always good

The Brown Bag lectures have been really interesting and I have learned quite a bit watching them. I do appreciate that they are recorded and I can watch the recording when I have a chance. Thank you very much for doing these!

wish I could access the recordings I had too miss

I have enjoyed these zoom classes much more than I thought I would have. Zoom lends itself to a more intensive study and is much easier to digest since there are no distractions. I have loved each one and learned a lot.

not at this moment

I thoroughly enjoyed being able to listen and watch at my convenience.

I have enjoyed all the presentations; my problem before getting into the "Zoom" mode was forgetting the meetings. So, I have certainly been grateful for the recordings. All the presentors have been knowledgeable and I like the questions that viewers asked through chat.

I love the system you have. If you do not have time to watch it at the time of the presentation you can go back and watch it later. I hope you will continue doing this in the future.

Thank you for doing these, they are terrific!!!!!!!!

This is such a wonderful way to reach many who would never have been able to attend in person.

More time spots would be nice for working people.

Very interesting and informative! Most enjoyable!

I hope you will keep the recorded versions accessible for viewing for a year or so ... there are some I didn't get to see and some I'd like to see again. Making access "for MGs" only would be fine with me.

Thank you for offering this.

Enjoyed all of them

Thank you for sending the link so if I can't watch it live I can watch it later. My schedule is so crazy a lot of times I can't watch it live.

I've enjoyed tuning into these live and the post talk link. Great way to offer expertise far and wide.

very good idea for keeping MG's and others informed and interested in gardening during the pandemic. Great Job!

These programs have been great during a difficult year. Happy we good continue to learn about things when everything was shut down.

I enjoyed every session even if I don't currently have an application for the knowledge. The intro music lifted my spirits...The information was always well presented...and I would not have had all these positive educational events without the horrible pandemic. You have enriched my life and made a tough time more than bearable. Thank you, Diane Fagan

Love them. I enjoy the recording. Can't always watch live.

I love these!

I have loved all of the Brown Bag Series! Full of excellent information for all levels of gardeners. Thank you to all for doing such an outstanding job.

Glad e had these educational sessions. Very interesting and informative

I really like this lecture series and that they a recorded so I can watch them if I missed the noon program

Blair's the bomb.

Learn more about pest ten any thing

I have loved these. So helpful in planning and gardening!

I've extremely enjoyed taking thes classes at home and on my time.

I have really enjoyed the program. I struggle with Wednesday lunch but that is just me. I'm sure it works for many others. The recordings help me a lot.

Love them! Keep them coming! Thank you so much!

It's a great series, I just forget to watch. I will start watching the recordings Y'all do a really good job.

A LOT OF HARD WORK HAS GONE INTO THESE SESSIONS. DUE TO COVID THEY HAVE BEEN A WELCOME. WITH MY FAMILY I HAVE BEEN ESTREMELY BUSY DUE TO INJURIES AND ILLNESSES SO HAVE NOT BEEN ABLE TO WATCH AS MANY AS I WOULD HAVE LIKED.

Thank You for doing the lectures

a

I have thoroughly enjoyed these sessions. The topics have been interesting and the presenters have been very knowledgeable. Keep it up!

I look forward to these, so helpful. Please keep doing these!

Only found out about Brown Bag lectures and started in 2021. Completed MG course in Fall 2019 class. Past gardening experience was in PA, NJ, and North GA. Very different considerations in AR so the classes are very valuable to me. Worked in computer software for many years so online trainings were something I had attended for many years.

I've enjoyed every lecture!

Thank you for making these available!

They've been very informative & have provided information that I would normally have to look up & read...They've also been very helpful during this pandemic & a good change. We've not been able to have our county MG meetings on a regular basis so the lectures have been great for our educational hours. Hopefully, pandemic or not, we can continue to have the Brown Bag Lecture Series. I'm thankful for the fact that if I miss one, I can look at it at a later time because it has been recorded & saved for a convenient time for me to watch. Thanks to all who have made the series possible! The series has been GREAT!!!!

Thank you for putting these together! I've learned so much and look forward to them!

I am always very impressed with the quality of the lectures. The presenters have all been very knowledgeable and relay their knowledge in a way that is easily understood and very advantageous to the common property owner.

Would like to see a thorough video on composting. Especially what can be used to heat the mixture. I do not have access to fresh manure.

Great series. I especially like the ability to go back and review or watch at a later date if unable to watch live. Keep up the good work!

I have really learned a lot from these lectures. Some more so than others. It is wonderful to hear all the information provided by people within our state. They are so knowledgeable and I am very envious of them.

These are great. So informative and fun!

Thank you for giving us this educational opportunity.

Although I may not be involved in a specific gardening activity, I still find the presentations worthwhile. Speakers have been good and I enjoy their expertise. I am retired so I find the Brown Bag series a good way to spend my time.

I have really enjoyed these. Speakers are always knowledgeable and the topics are not too broad and not too narrow. Good work!

Thanks! They have been great!!

Very good lecture series, lots of useful information.

These are so great and I really like they are during the lunch hour

Interesting presentations.

Appreciate the series very much! Have started watching the recorded lectures more recently due to being busy outside during original time period, but that works well.

Excellent presentations.

A very worthwhile series. Thanks

Even if it may not apply to me, someone may ask the MGs a question about most any garden related subject, and I would like to be able to answer it knowledgeably.

Very good Speakers & well presented..Enjoyed recipes.

Love these sessions & have learned SO MUCH from them. Thanks

These are wonderful!!!! Thank you!!!

Thank you for doing this!

Thank you for having these lectures available, I appreciate it. I hope they continue.

A garden planning session would be so helpful! How to draw out your space and plan what veggies need to go where, which items to plant next to each other and which items to keep away from each other, etc.

I really appreciate it when the topics include information specific to northwest Arkansas when it's different than what applies to the Little Rock area.

Would like to see more on Arkansas natives as well as herbs, organic gardening. Thanks so much!

I've enjoyed everyone of them.

I have really enjoyed the BBL's. The speakers have all been really interesting and knowledgeable. Please keep doing the series as long as you can!

Christmas trees were a great topic, it featured something totally different!

I haven't attended any sessions yet. It would be helpful to receive information about the sessions sooner so I could plan my schedule around them. I usually don't receive an email about the lecture until the day before. Additionally, if you could include info about the session in the body of the email, rather than just in the attached image, that would be helpful.

Excellent series. Thanks for sharing all that knowledge.

Brown Bag lectures are quite useful; participating from home is convenient. Thank you.

Haven't been able to connect to all, different things have come up but I have enjoyed the ones that I have made, I

feel connected

Have really enjoyed all the BBL's - don't miss any except if something unforeseen comes up. As a new comer to Master Gardeners sometimes there are certain terms or abbreviations which go over my head but I've started noting them down and then go back to the UADA website and look them up. So far that has worked !!!

This lectures have been a lifesaver during the Pandemic! Thank you so much for offering them.

pruning bushes

Great job!!!! You've really helped with my attitude during winter & covid.

These lectures provide an important educational resource during this period of pandemic and social distancing.

As a beginning Master Gardener, I have much to learn about a variety of topics. At this time my gardening space is limited on what I can grow.

Thank you for offering this.

Excellent program. Please keep up the good work. I also enjoyed the lectures from different areas around the country. The FL one on commercial growing in the state was excellent.

Enjoy these series very much. Keep up the good work.

I've enjoyed and learned from each session I have attended. I appreciate your making these available and hope you will continue.

Have really enjoyed! Very informative. Thanks for providing them and hope you continue to have them.

Appreciate the hard work put into these!

I have enjoyed the variety of programs and the presenters are very knowledgeable.

Thank you for putting these on!

Have enjoyed most of the BB lectures that I have seen. Am so thankful for the hard work you and your team have done putting them together for the public and Master Gardeners. I look forward to more lectures in the year ahead. Thank you for all that you and your team do, great job!!

I have appreciated being able to watch them later if life interferes.

So grateful for the brown bag series - thank you,

I love this method of learning

Enjoy the programs and diversity

I appreciate the recordings as sometimes I am not able to attend at the scheduled time and this allows me to view when I can. I also appreciate attachments or links. Thanks for this series. It has been interesting & informative

This has been so helpful while we have been at home to keep us connected to the Master Gardeners as well as teaching us about the different subjects. Thanks so much for doing this.!!

Absolutely love the programs, I learn something every time. I appreciate you taking the time to do them. It is a really good way to get education hours for MGs.

Wish I had more knowledge on how to determine what is a weed and what is a wildflower. Also the best way to get rid of weeds and not kill wildflower

I love these! I have been forwarding them to coworkers, too. Thank y'all.

Woinderful

I really like the Zoom sessions - no distractions and so convenient.Thanks for doing them.

These Brown-Bag lectures have been wonderful. The presenters are extremely knowledgeable and their slides and lectures are well organized and clear. The depth of their knowledge is especially evident during the Q & A sessions. Thanks to all the people who have made this program so successful.

I love this series of programs! The fact that they are zoom sessions and recorded make them even better! Often I am mildly interested in a subject but not enough to wash my hair, get dressed and drive 40 minutes to attend a meeting/program. This week's nematode program is a perfect example--I never would have driven all the way to Conway to attend that program but by zoom I dropped in and learned ALOT! Who knew nematodes could be so interesting?!! I am sure doing these weekly is a chore, maybe cut back to monthly or twice a month. Thank you, Thank you, Thank you! Oh, other program suggestions, Alocasias/Colocasias, Camellias, the 10 (or 5) most frequently asked questions you get as an agent, the 5 most common fungal diseases and how to deal with them,

Presentations are all well done, informative, and enjoyable

The sessions are wonderful and extremely informative.

I have enjoyed them very much. I love that I can still see them when I have to miss one. At this moment I am waiting to take my wife home from hospital so I missed a couple. I do wish you would record the Q and A part. Maybe 2nd recording. Some of it is GREAT and I would love to hear it also. I am one who takes notes but sometimes I just can't keep up or get the chemical or name written down!

Thanks for providing such informative programs. I hope they will continue even when we return to normal interactions. This is such a great source of education hours for Master Gardeners. I enjoy the preprogram music too. The zoom classes are very informative and a great refresher. My only problem is forgetting until its to late. I seem to check my callendar from time to time so I write the time down now to see if that will help my brain fog from having Covid.

Great job! Keep them coming, please.

I have enjoyed this so much I have wanted to attend before but could never find the time to drive the two hours back and forth for the one hour lecture. I hope when things go back to normal zoom will still be a part of this series it allows those of us a distance away to participate

I have really enjoyed the Brown Bag lecture series.

Landscaping design, designing a cutting garden,

Have enjoyed the brown bag lectures.

Learning new things is important, of course. But for me, reiteration of known gardening principles is almost as important as learning new things.

The presenters are very informative. I have really enjoyed and learned a lot from the different topics.

Have enjoyed new information

MY GO TO for whats happening in AR on any kind of gardening. Super presenters, very educated on the subject matter. Look forward to each and every presentation. In a word, OUTSTANDING.

I always enjoy Sherri's professionalism and humor in her moderation. I've only been a Master Gardener since October but I am impressed and amazed by the volume and topic range of Brown Bag Lunch programming that has been presented in that timeframe. I believe y'all are doing an excellent job. Keep it up!

Appreciate opening this up fir all to view

I have enjoyed these seminars a lot and I appreciate that if I can't watch live, I can still see the recording when I have time. It seems like you have had a lot of presenters from different areas around the state that I wouldn't normally have a chance to learn from and I like that. I have been gardening for a long time so I have a good knowledge base already but I still learn something from most of the classes.

I really like and appreciate the recordings. I can review them and make notes. Sometimes I forget and miss the zoom presentation but can still watch the recorded version. Thanks so much for your hard work.

Great lectures. Very informative. Love every minute of them.

Have really enjoyed these. Thanks to you knowledgeable presenters

I loved learning through this series! Thank you for offering it!

Love being able access the recordings as not always able to participate when live.

I love the brown bag lectures, i have learned so much and have done it all from home. I wouldn't have attended if it had been an in person event.

The speakers are never boring. I always learn something.

Thank you

I prefer meetings, but these sessions are a great substitute. thank you for all the work involved in getting these to gardeners starving to get back in the garden again.

Love these lectures!!

The ones I've viewed have been very informative...thank you.

Enjoyed all the brown bag lectures I am a Miller county master Gardener living in texas

I would to see Dr. Clark show about pruning muscadines and seedless grapes to get the best production. I am not sure what to spray on them especially the seedless.

I have thoroughly enjoyed the Brown Bag series. I have learned so much and I don't even have to get dressed and go somewhere. I appreciate all the hard work that has been done to do these lectures.

Need link to access zoom meeting in advance via email Need more lead time..

Enjoy them

I have looked forward to every Wednesday for these programs. It has made me feel a little closer to the Master Gardener programs I have been missing this year. Thank you so much!

I really like the noon hour timeline. I always learn something new when I attend these lectures. thank you

Thanks to all who went to the trouble to put these great programs together. There is always something new to learn and I have enjoyed everyone of them.

Loving being able to listen vie zoom and learning so many new things

The print of the audio has some very interesting interpretations of many of the actual words of the speakers.

I have very much enjoyed these lectures and learned a great deal from them. Hoping they can continue.

I really enjoy your BB series, got started in the middle of the year last year. I would like to see the ones I missed on your website, but don't know how to access them. So far I only watched recordings when I missed them.

Thank you for these lectures. I have certainly enjoyed them. Please continue them.

Very helpful. You try to make it as simple as possible. Which I need Please make them where they can be watched later I am a new master gardener

Lectures and presenters are all very good and knowledgeable.

I have enjoyed the information provided by the speakers. It is nice to expand my knowledge while staying away from crowds.

Really enjoy the convenience of learning via Zoom. So much easier than driving all over the state!

I have thoroughly enjoyed having these educational opportunities on a regular basis. I enjoyed having handouts to peruse beforehand or after the presentation.

Suggestions on things to use that one may have or can save to use. SAVING MONEY!!

I love this. I also think it is great that if I need to miss one because of a scheduling conflict that I can view the recording.

Good series

This is such a great idea. I hope you keep this program going.

Not only have I enjoyed the series but have learned quite a bit!

I'm thankful for the quality of the programs and the opportunity to view them remotely.

Lessons learned from experienced gardeners in starting, maintaining perennial beds Propagation techniques

Glad to have opportunity to review if I have missed something

My problem has been I am a late nighter; therefore, I am a late sleeper and I have missed some that I have registered to watch. HOWEVER, I have really enjoyed and learned from those that I watched.

There has been a good variety.

It's always a great experience with UAEX's workshops! Thanks

Having the recordings available is very helpful.

So appreciate you making these available and that they were quality seminars!!

I have enjoyed all that I have viewed and love how you record in case I miss one I can watch at a later date more convenient. Thank you and the speakers you get are exceptional, very knowledgeable.

This series is a wonderful opportunity for us to learn from the experts. The format is user friendly and I really enjoy getting to participate!

I have really enjoyed these!

Love these webinars! I think they've helped to keep me sane in this tough time. Presenters have been knowledgeable, materials very helpful and professionally presented, the team is FUN, the music beforehand is energizing.

I have thoroughly enjoyed the opportunity as a new Master Gardener to learn and grow in my knowledge and skills. The speakers have been excellent, and such a positive thing to look forward to during this past year. Thank you!

The presentations have been so informative and interesting. Other areas that would interest me are organic and raised bed gardening, herbs (culinary), native plants.

Love these

I appreciate your efforts to sponsor these educational opportunities. I hope they continue even after the pandemic. I don't have to travel long distances and can listen on my own time if necessary. Thank you so much!

These classes are wonderful! It is nice to know we have so many knowledgeable people in our state and available to us.

love the presentations. So helpful to get educational credits during the covid pandemic.

I'd like it to be made known ahead of time if a presentation is going to be exclusively about conventional/chemical-intensive practices. I was excited to attend the pecan presentation only to hear the speaker say that Arkansans can't really grow pecans without pesticides. That meant it didn't apply to me, since I do not nor will I ever use those practices. So that felt like a wasted hour that I would have skipped if I would have known that fact. I'm not at all opposed to talking about both conventional and organic methods, though, since I know not all feel this way. But if it's all one way or the other, best to tell folks. If you do beekeeping, I'd say the same thing about beekeeping. Folks feel very strongly about using or not using miticides and other chemical-based pest management.

all exceptionally well done and grateful to have had them during this COVID time. thank you to all

Like all of them 7

These lectures have been great. Appreciate the recordings as I can go back and review. Also appreciate the handouts. Thank you for all the hard work you are doing to make these available to us.

Good information.

Extremely knowledgeable, retainability, I pray.

I have had to miss for work, having the recording has been great! All of them have been very educational.

Zoom presentations are what is keeping Master Gardeners going during these trying times

Great platform for learning! This should have been introduced years before. I think continuing the series will benefit the seasoned and new gardeners. Keep up the great work!

THIS IS A WONDERFUL PROGRAM. I LOOK FORWARD TO THEM. EVEN IF THE PROGRAM IS NOT MY PARTICULAR AREA OF INTEREST, I ENJOY IT AND LEARN THINGS I DIDN'T KNOW I DIDN'T KNOW. KEEP IT UP IF YOU CAN.

Great content!

Great programs and presenters.

These are very helpful for a new master gardener. Thank you

The lectures were very informative, useful and enjoyable.

All sessions have been exceptional and professional

I find these very informative and appreciate that the recording is sent out. I have a 90 year old to care for and I can't always watch them when first on. Thank you.

Thanks for doing these

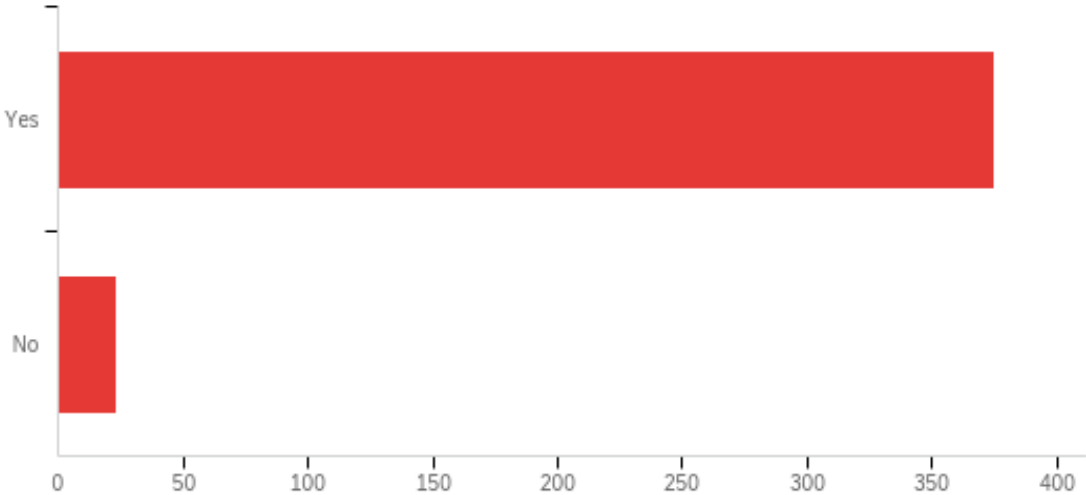

Very valuable seminars. I have learned so much that I use. Regret not participating in more.

These brown bags have been so wonderful for me as a new vegetable gardener!! They've given me a good introduction to each topic, which has allowed me to build confidence to dive into some things I had not planned on planting (such as potatoes!) and to decide to hold off on others that I might not be ready for (waiting until next year on the berries). Thank you so much!!!

These have been wonderfully informative, and I love getting to continue my MG education through these presentations. The fact that they're done by Zoom and I don't have to travel to enjoy them is better still. THANK YOU!!!!

Excellent series. Sherri and her support team did an amazing job of providing great speakers, a variety of topics and a place to go with other Master Gardeners. Thank you!
