Top of the Day, to all of You!

Warning Striped Cucumber Beetle is flying, again. They like to feed on the pumpkins skins! Check your pumpkin(s) often!
 Second Warning! RODENTS – Voles, Chipmunks, Mice, Etc. numbers high and are actively destroying several crops – so keep your checking your pumpkins daily!
 Good Day! Thanks to everyone who sent their SVB number in! Just a couple of growers need to get the trap numbers in.
 This week, SVB are only in a few places, so, doesn't look like we are going see a wide-range area where SVB are present (second generation?).
 Great for everyone other than **those few that are catching SVB Moths!**
 If possible, I would like to continue collecting number through the end of September.
 However, I know a few of you have pulled your traps, that fine. I need to know date you pulled your trap and if the trap(s) are still in good condition so that they can be used for another year. You still get the reminder emails.
 Once you are done for the season, PLEASE wash the net trap, once dried and store it in a garbage bag in a dry location out of the sunlight.
 Thanks for your participation! George

Number of SVB Moths Caught per Trap during 2020 Growing Season
