NETWORKING

Continuing Education

Continuing education is key to supporting new and beginning producers in the cattle industry. Panhandle Cattlemen's College provides multiple opportunities for past, current, and future participants to receive expert instruction on a wide array of topics.

Educational materials are delivered via webinars, field days, and individual consultations.

Field Day Topics

Equipment Demo's

Soil Preparation

Planter Calibration

Sprayer Calibration

Weed ID and Management

Fence Design

Gate Placement

Cross Fencing

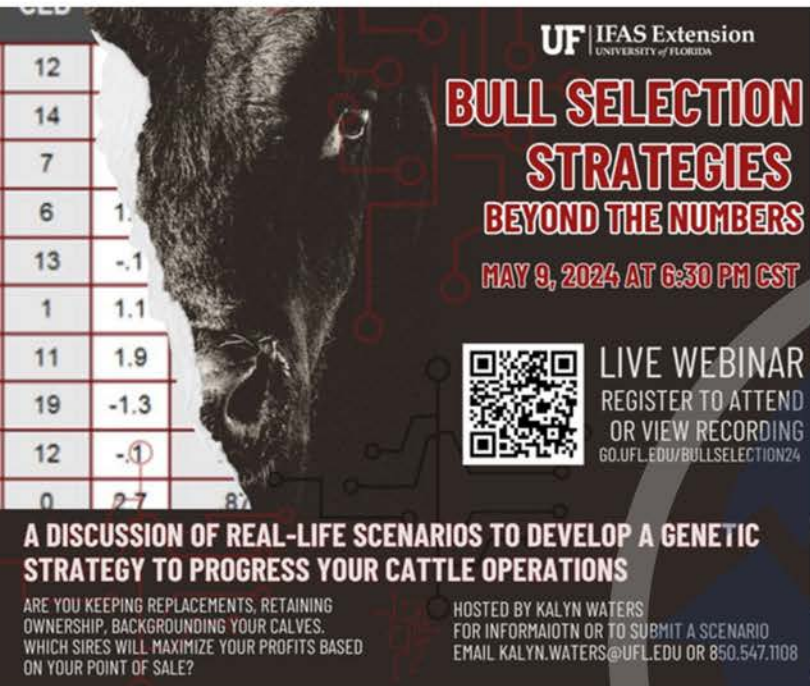

Rotational Grazing

Operations Layout

The Panhandle Cattlemen's College Pasture Class was an add-on field day hosted where clients worked hands-on with state specialists to prepare ground and plant different forage crops using tractors and implements. Additionally, participants laid out and built a fence, calibrated a sprayer and a planter, identified weeds, and took soil samples. This program included the collaboration of multiple state specialists and county agents.
